TEC4 DPF & TURBO SYSTEM CLEANER

Stop start driving conditions reduce the engines ability to make the adjustments necessary to induce regeneration of the DPF (Diesel Particulate Filter) causing a continual build up of soot and carbon in the filter.

Tec4 DPF System Cleaner has been specifically designed to fix this problem.

1 A COMBINATION OF 4 TECHNOLOGIES:

- Aids passive regeneration of the diesel particulate filter.
- Reduces the temperature at which soot particles combust.
- Reduces soot emissions.
- Improves stability of DPF systems.

2 KEY BENEFITS:

- Combats the adverse effects of stop start driving.
- Lowers the temperature at which soot particles are burnt off.
- Aids passive regeneration of the DPF system.
- Improves engine performance and response.
- Compatible with all diesel engines.
- Reduces exhaust emissions.

DIRECTIONS FOR USE:

Use only as directed in compression ignition engines.

Add one 400ml bottle of **Tec4 DPF System Cleaner** to the contents of the fuel tank.

For engines that have a fuel tank larger than 100 litre capacity add at 0.5% by volume.
